AESTRACT

This book illustrates a five phase technique for searching any of the abstract publications of the Educational Resources Information Center (ERIC), in particular Research in Education (RIF) and the Current Index to Journals in Education (CIJE). It is a self-instruction tool that can be used by "Everyman" who has a problem or information need within the realm of education, and who wishes to learn to maximize his literature searching effort through some shortcuts that simulate a computer search system. The five phases are: 1) formulating the problem statement; 2) using the ERIC Thesaurus or authority list of index terms; 3) searching the subject indexes; 4) reviewing the document resumes which contain bibliographic information, index terms, an abstract, and ordering information; and, 5) directions on where to find the ERIC Documents or how to order them. Subscription information for the monthly issues of RIF, CIJE, the annual cumulations, and the microfiche collection of documents is included, along with a list of other guides to using FRIC. Everyman's Guide: An ERIC Search System for Social Studies Teachers, Consultants, and Librarians.

Many words have been written about ERIC--what it is, why it was developed, how the network does what it does, and what its publications are--but few words are found that describe its true power or how to use its products and research tools, especially Research in Education (RIE), and Current Index to Journals in Education (CIJE). Hence, this "Everyman's Guide" to using ERIC.

There are two basic ways of searching the 1000 documents abstracted in RIE and the 1000 journal articles annotated in CIJE monthly--with your own two hands, or with the help of a computer.

The ERIC information system is designed for computer information storage and information retrieval. Interestingly, the number of computer installations that offer search services to the field are growing rapidly. By the beginning of 1971 there will be 30 such centers with user services available on a regional or stare basis. They will have the capability of searching the entire ERIC document and journal collection on almost any conceiveable topic in education.

However, you are not limited to a computer. This guide offers some manual search shortcuts that simulate a computer search system and will simplify and maximize your review of the literature. After all there are over 60,000 documents listed in RIE and CIJE with complete bibliographic information, as well as abstracts or annotations.

Manually you can: 1) read RIE and CIJE from cover to cover every month for awareness of current research and research-related documents on everything under the sun; or 2) look under specific topic headings in the Subject Index, or specific authors in the Author Index, or specific publishers (or institution sources) in the Institution Index.

The only requirements for the first technique are literacy and the patience of Job. In the second technique, looking through the Author and Institution Indexes is about as easy as browsing through the phone book. The tricky, but most rewarding, part is making a thorough search for subject information in the Subject Index.

THE SEARCH SYSTEM

PHASE 1: PROBLEM STATEMENT

Before lifting a finger to search for anything you must establish a clear-cut search direction. It is very easy to become side-tracked into all kinds of interesting but unrelated concept areas while looking through the Subject Indexes.

Therefore, the first step is to write a concise, specific summary of your problem or information need, including major topic area, any specific subtopics within this area, instructional level (e.g., elementary, grade 12), and the type of information sought: research, methodology, theory, projects, reference. Be as specific as your need requires you to be.

EXAMPLE: Using <u>Inquiry</u> Methods in the <u>Secondary</u> <u>School Social Studies classroom.</u>

Major Topic - Social Studies

Specific Subtopic - Inquiry

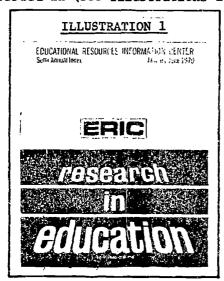

Level - Secondary

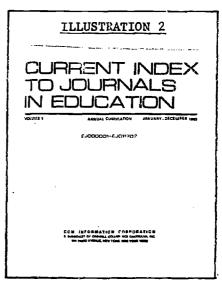

Type - Methods

Underline your key concept phrases or list them as shown. These keywords will become your search terms.

PHASE 2: SUBJECT INDEX SEARCH

A. Locate the <u>Research in Education</u> (RIE) or <u>Current Index to Journals in Education</u> (CIJE) annual index or semi-annual index for the year or years you are interested in (See Illustrations 1 and 2).

-3-

These are compilations of the monthly RIE and CIJE indexes. If annual or semiannual indexes are not available, each monthly issue can be searched. However, this tends to be a lengthy and repetitive process.

B. Take one search term at a time starting with the Specific Subtopic. is the most critical term because it is the most specific. Turning to the Subject Index for 1970 (See Illustration 3) you will find this ERIC Descriptor:

Inquiry Training

Titles, and ED numbers in RIE or EJ numbers in CIJE are included in each citation. Don't hesitate to list all documents even remotely touching upon your PROBLEM STATE-MENT. Even if the level or the discipline in the title do not indicate secondary social studies, the document may still be very useful. Don't list the title--list the ED or EJ numbers in a column (See Worksheet A). These are the accession numbers and are used for cross-reference, document location, and document ordering.

C. Take the Major Topic and do the same.

In this case: Social

WORKSHEET A Subject Index Search "Using Inquiry Methods in the Secondary Social Problem Statement: Studies classroom Search Terms: Inquiry Training Social Sciences Social Studies Social Studies Units Inquiry Training Social Studies ED 032 702 ED 032 247 ED 032 793 ED 032 324 ED 034 796 ED 036 535 ED 034 738 ED 035 066 ED 036 536 EJ 018 204 ED 036 551 EJ 018 394 EJ 018 400 Social Studies Units EJ 018 403 EJ 018 404 ED 032 326 EJ 018 405 ED 032 327 EJ 018 677 ED 033 143 EJ 018 734 Social Sciences ED 036 452

Studies. The Subject Index for 1970 (See Illustration 3) lists:

Social Sciences Social Studies Social Studies Units

List these ED or EJ numbers in a separate column (See Worksheet A).

It is very likely that you will come across ED or EJ numbers listed under more than one of the Descriptors above in the Subject Indexes. For example: ED 035 066 found under Inquiry Training may also be found under Social Sciences. If this is so, both Descriptors were assigned to that resume through the ERIC Coordinate Indexing System, because resumes are best retrieved by combining or

coordinating two or more Descripte's during a manual or automated SUBJECT INDEX SEARCH. Consequently, when you find an ED or EJ number a second time under another Descriptor, simply circle the identical number previously listed on the worksheet (See Worksheet A). This step makes special note of the most appropriate document resumes. A retrieval specialist can ask a computer to go through much the same process by asking for a listing of those ED or EJ numbered resumes that include both Inquiry Training and Social Sciences.

E. In a manual search the <u>Level</u> and <u>Type</u> Descriptors are seldom as useful because of their extremely general nature; they contain document citations from a conglomeration of topic areas. (They are, however, critical in an automated search on a specific topic.) If you feel that you should look under these terms for citations, the method is the same. Once you have a list of 20 or 25 numbers that seem appropriate, proceed to PHASE 3: REVIEW OF THE DOCUMENT RESUMES. However, if you have found yourself in any trouble, Optional Phase 5 will be a great help.

PHASE 3: REVIEW OF THE DOCUMENT RESUMES

This is the simplest step in the ERIC Search System. You have your list of ED or EJ numbers; these are your accession numbers (Worksheet A). The document resumes are included, in ED or EJ number order, in the <u>Document Resume Section</u> of each ERIC publication.

- A. Make note of your lowest number; this is your starting point for locating and scanning the resumes.
- B. Before you even pick up <u>Research in Education</u> or <u>Current Index to Journals in Education</u>, it is important to have every monthly issue in front of you, starting with the one that includes your lowest ED or EJ number. For example, if this number is ED 031 755 or EJ 018 204 you will need—January 1970 up through the most current month (here, June 1970).
- C. For the sake of convenience you will want to move through your list of ED's and EJ's and read the corresponding resumes in some sort of numerical order. Look up and read all the ED 032 000's, 033 000's, ED 034 000's and so forth until you finish your last ED number series. Then, look up and read all the EJ resumes.
- D. Cross out the numbers on your list that you have rejected, leaving ED and EJ numbers of those documents you would like to order and read.
- E. In most cases, the ED number is all you have to keep track of; however, watch for those resumes that say "Document not available from EDRS," and make a note of them on a separate sheet (see Phase 4A--2, 3).
- F. In the case of the EJ resumes, you will have to keep track of Journal Title, Volume and Issue Number, Article Title, and Author. Also make a note of these on a separate sheet.

Remember, the resumes are only summaries of what is contained in the documents. However, there may be sufficient information in a resume to satisfy a need for very general information. In addition to the document abstract or annotation, all the bibliographic information you need is included in the resumes (See Illustration 4):

ED Number Legislative Authority

Descriptors - * Questioning Techniques, Social Studies, Student Teacher Relationship. Thought

Processes This pamphlet is designed to aid teachers, particularly social studies teachers, in improving their classroom questioning techniques. An in-troductory section notes the importance of effective questioning in the stimulation of thinking and learning. A technique is suggested by which a teacher can measure his question-response patterns by tape-recording classroom discussion and plotting the teacher-student question ratio. A discussion of the relationship between the teacher's purpose and types of questions used includes sample questions to illustrate the various classifications of questions according to the levels of intellectual behavior they elicit, e.g., Bloom's six levels (knowledge, comprehension, applica-tion, analysis, synthesis, and evaluation); Pate and Bremer's convergent and divergent questions; and Bremer's convergent and divergent questions; and Carner's concrete, abstract, and creative levels of questions. A suggested list of "skeletal questions" is provided, applicable to various contexts and grade levels, and a list of "Guidelines for Good Ouestions" discusses precise wording, appropriate timing, clarity of purpose, individualization, elicit-ing student response, encouraging student questions, exploring incomplete answers, and stimulating creative thought. "Ouestion-Asking Practices To Avoid" are also listed. A 17-item annotated hib tography provides selected references, (JS)

- * Descriptors
- * Identifiers (appear in Brackets [] at the end of the descriptor display)
- * Annotation
- * These sections contain all the <u>vital indicators of the substantive content</u> of any document.
- ** The EDRS price may appear in several forms:

MF--\$0.65 HC--\$3.29 (Microfiche and hardcopy available from ERIC)
MF--\$0.65 HC--Not Available from EDRS (Microfiche available from ERIC,
hardcopy can be ordered from the alternate source listed

under "Available from")

Document Not Available from EDRS (neither Microfiche nor hardcopy is available from ERIC, but the document can be ordered from the alternate source listed under "Available from")

PHASE 4: FINDING THE DOCUMENTS

- A. There are four ways you can get the documents abstracted in RIE:
 - 1. Order the Microfiche (See Illustration 6) or hardcopy at the price listed on the document resume, asking for a document by ED number, type of reproduction (MF, HC), and number of copies of each ED (Microfiche, \$0.65 per title; hardcopy, \$3.29 per 1-100 pages; orders totaling less than \$10 must include payment).

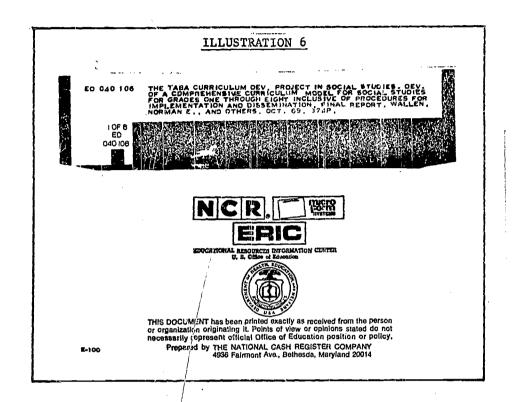

From: ERIC Document Reproduction Service LIPCO
P.O. Drawer O

Bethesda, Maryland 20014

- 2. Order the hardcopy of those documents "Not Available from EDRS" or those with "HC Not Available from EDRS" from the source given in the document resume under "Available from" (See Illustration 4). In this case, state: ED number, Author, Title, and Date in your order letter.
- 3. Borrow the hardcopy from a library as you would any other document.

 The ERIC documents are shelved by ED number. If the document is not available, you may be able to borrow it through an Inter-Library Loan System.
- 4. Borrow the Microfiche from a library that maintains the ERIC collection.

Many universities, State Departments of Education libraries, and local school districts have the entire collection.

- B. There are three ways to get the journal articles indexed in CIJE:
 - 1. Subscribe to the journal.
 - 2. Buy a single copy of the journal.
 - 3. Write to the author and request a reprint of the article.
 - 4. Borrow the journal from a library.

PHASE 5: AN OPTIONAL PROBLEM-SOLVING SEARCH TOOL

A. Has it been difficult or impossible to locate appropriate Descriptors in the Subject Indexes; are there very few documents listed; or are those Descriptors that at first glance seem appropriate found not to be, because the document citations concern themselves with some altogether different concept? Have you come across many other ideas that are related to your original PROBLEM STATEMENT during your search of the Subject Indexes, or do you wonder what other Descriptors might be effective?

-9-

ERIC has designed an authoritative list of Descriptors (See Illustration 7) as a key tool to help you label the concepts for your PROBLEM STATEMENT, label new ideas you have found in your SUBJECT INDEX SEARCH, or find ore Descriptors to use in a subject index search.

The two major sections of the

Thesaurus are the Rotated Descriptor Display
and the Descriptor Listing. The Rotated

Display is a generic list of every Descriptor. Each Descriptor is rotated alphabetically to take into consideration each word of any multiword Descriptor. The
beauty of the Rotated Display is that you can start with the key concepts in your
PROBLEM STATEMENT and label them with
Descriptors before you get tangled up in an Index or Listing. It cuts down on endless, aimless page-flipping, serves as

ILLUSTRATION 7

ERIC

Scope Note (SN) Not a formal definition, but a statement of usage.

- Used for Terms (UF) Not Descriptors, but they tell you what popular concepts are included within the Descriptors that they are listed under. These UF terms are found in the alphabetical listing of Descriptors with a "Use" notation referring you to the Descriptor and to the display you want to look at.
- Narrower Terms (NT) Directly related to the Descriptors they are listed under, but they are more specific Descriptors.
- Broader Terms (BT) Also directly related to the Descriptor, but they are more general Descriptors.
- Related Terms (RT) Additional terms to look at.

B. The "How"

Looking through the Thesaurus is a process that starts with either the Rotated Descriptor Display (if you have had problems in labeling concepts), or the major topic and subtopic terms you have used to this point in the SUBJECT INDEX SEARCH. List the Descriptors you have been using in your search, or the Descriptors you found in the Rotated Display in alphabetical groups:

Inquiry Training Social Sciences Social Studies Social Studies Units

Look up Inquiry Training in the <u>Descriptor Listing</u> to find the display (See Illustration 10). You find:

Cognitive Processes Learning Questioning Techniques Teaching Techniques

Write these terms down (See Worksheet L). Make a notation that you have checked Inquiry Training—this helps you remember which displays you have looked at (your list of new search terms will —t quite long). Look up Cognitive Processes to find its display (See Illustration 10). You find:

Inductive Methods Deductive Methods Thought Processes

Write these terms at the bottom of the list. Mark Cognitive Processes completed. Look up learning and look at its display (See Illustration 10). You find:

Discovery Processes Learning Activities Write these terms at the bottom of the list. Mark Learning completed. Continue down the list of Descriptors, checking the displays for each term and adding new appropriate Descriptors at the end of the list until there are no more displays to be looked at, and no more terms can be added to the list. A new cycle, similar to this one, initiated with Inquiry Training can be started by Checking the displays for your other original Descriptors—

be the end to the ERIC Search System.
All that is left is the other half

of the job--to read the documents you receive, to make generalizations, to identify the implications of using the newly found ideas, and finally to implement these ideas.
